

# AMANA BUNDLE SAVINGS

THE GOOD GUYS PASS LABOR SAVINGS ONTO YOU!

## Now available for the **WHOLE HOME**

Amana's NEW S-Series equipment is ground breaking. With the new side discharge design, it takes up less space and the inverter driven compressor runs incredibly quiet compared to it's older counterpart. The technology and efficiency that mini-split Air Conditioners have enjoyed for the past two decades is now available for your entire home.

When you upgrade your Furnace and Air Conditioning system at the same time there is labor savings on our part, as we can complete an installation in one day. Not only will you have a fantastic system that will deliver reliable comfort for years to come, you may even qualify for Tax Credits, Focus on Energy Rewards and the upcoming Inflation Reduction Act credits that are still being worked out by the state.
